My hotel is located in the Putri Hill area. There are other hotels in the area which are all beautiful. My hotel has fifty rooms. Ten rooms are luxurious. The rooms are air-conditioned and there is a colour TV in each room. The other forty are business rooms. It means the rooms are simple, with fans and black-and-white TVs. In the luxurious rooms there are always double beds but, in the simple rooms only some have double beds. Our guests come and check in or check out at the receptionist's desk. These people also help the guests with their needs. They can order food and the receptionists ask our restaurant to serve them. Guests can have breakfast, lunch or dinner in the room or in the restaurant. Room service is ready with orders. The receptionist can also help guests with their laundry. The laundry woman will wash and iron the clothes. The room-keepers clean all the rooms every day. Look! Some guests are coming. The bellboys help guests with their bags. They will have a seminar tomorrow. It is in the convention hall. I'll ask them to sit at the lounge.

A forest is an area that is full of trees. We can find in the islands of Indonesia. They spread along the island of Sumatra, Java, Kalimantan, Irian and other island in Indonesia. They are very important for our lives.

Forest give us many kinds of export commodities such as timber, rattans, as well as rubber. Forests also protect us from danger of floods. In the rainy season the roots of the trees in the forest absorb the rain water and store it under the ground. In the dry season the water will come out and it is very useful for us for reservoir and irrigation. If there are no forests, the rain water cannot be stored, there will be erosion of the soil and we will suffer from terrible floods.

Forests also help us to purify the air of pollution. The trees of the forests need carbon dioxide from the air and send the oxygen out into the air, wich make the air fresh and pure. The fresh and pure air is needed for our health.

We can also find many kinds of fauna and flora in the forests. Animals and plants need forests to live. To ensure the continued existed of the animal and plants in the forests, we have to protect it from destruction. Realizing that the forest gives us a lot of important things, we

should keep our forest safe. Our forest is our environment.
